Applications

Arch. Elements

Moldings

Tile

Mosaics

Considerations

Freeze Thaw
Vertical

Low Variation

High Traffic

Technical Data

ASTM 97 Density	ASTM 97 Absorption	ASTM C170 Compressive Strength	ASTM C880 Flexural Strength	ASTM 353 Abrasion Resistance
147.7 lbs/ft ³	4.03%	6,700 (lbs/in ²) wet	580 (lbs/in ²) wet	24.8

Care and Maintenance:

- High acid sensitivity is a property of travertine. Care must be taken in the presence of acidic foods and cleaning products.
- Low abrasion resistance is inherent in most travertines. Light scratching will occur with exposure to abrasives. A patina will result over time. It is recommended to use mats at entrances in flooring applications.
- This travertine has a low to moderate absorption rate. It is recommended to seal this material prior to use. Sealers allow for additional time to "clean up" the spill, before it has time to result in a stain.
