Maderno is a highly versatile material, with light neutral tones and classic travertine movement. This material does contain a wide variation in color and structure.

SOURCE: North America

### Applications
- Arch. Elements
- Moldings
- Tile
- Mosaics
- Mosaics
- Arch. Elements

### Considerations
- Freeze Thaw
- Salt Water
- Med. Variation
- High Traffic

Care and Maintenance:
- High acid sensitivity is a property of travertine. Care must be taken in the presence of acidic foods and cleaning products.
- Low abrasion resistance is inherent in most travertines. Light scratching will occur with exposure to abrasives. A patina will result over time. It is recommended to use mats at entrances in flooring applications.
- This travertine has a low to moderate absorption rate. It is recommended to seal this material prior to use. Sealers allow for additional time to “clean up” the spill, before it has time to result in a stain.
